Executive Summary

Project Name	Space Coin
Project URL	https://into.space/
Protocol Overview	Space is a decentralized prediction market platform built on Solana where you can trade on real-world outcomes across crypto, politics, sports, technology, culture, and more - and earn rewards for being right.
Space Coin Overview	\$SPACE is SPL token and it is a utility token designed to enhance the efficiency and usability of prediction markets without restricting demand from the user base. Requiring users to buy, hold or stake tokens in order to use a product gates access to it; Space enables everyone to use the platform without forcing them to interact with the token as this would limit demand and user base.
Method	Manual Review.
Timeline	9th February 2026
Audit Scope	The scope of this audit was to analyse the Space Coin SPL Token Address for quality, security, and correctness. https://solscan.io/token/7ZepRdt5BsrSYbFsgWtKNXihtoocBCYAgZiuZNXGxaGA

Manual Review Analysis

Token Details:

Token Details:

Name: Space (SPACE)

Symbol: SPACE

Decimals: 9

Current Supply: 1,000,000,000

Contract Address:

[https://solscan.io/token/
7ZepRdt5BsrSYbFsgWtKNXihtoocBCYAgZiuZNXGxaGA#metadata](https://solscan.io/token/7ZepRdt5BsrSYbFsgWtKNXihtoocBCYAgZiuZNXGxaGA#metadata)

Mint Authority:

Our technical team has successfully checked that the mint authority is disabled for the specified contract address. This ensures that no additional tokens can be minted, providing stability and security for the token holders.

Decimal Specification:

Our technical team has successfully checked that the decimals have been set to the exact value specified, i.e. 9. This precision ensures that the token can be traded and utilized as intended, providing a seamless experience for users.

Freeze authority active :

The Freeze authority is disabled for the specified contract address.

Metadata mutable :

Token branding (name, symbol, metadata URI) can not be altered by update authority.

Solscan Proof:

To further validate the information provided, we have attached a Solscan proof that confirms the mint, freeze, update authority disablement and decimal specification. This proof serves as an additional layer of assurance for you and your stakeholders.

Closing Summary

The token is working as intended with the following things:

- ✓ Mint authority is Disabled (no new supply possible)
- ✓ Freeze Authority is Disabled
- ✓ Update Authority is set to System Program, So now the metadata is set in stone.
- ✓ Decimals are correct (9 decimals)
- ✓ Current Supply: 1,000,000,000

Disclaimer

At QuillAudits, we have spent years helping projects strengthen their smart contract security. However, security is not a one-time event—threats evolve, and so do attack vectors. Our audit provides a security assessment based on the best industry practices at the time of review, identifying known vulnerabilities in the received smart contract source code.

This report does not serve as a security guarantee, investment advice, or an endorsement of any platform. It reflects our findings based on the provided code at the time of analysis and may no longer be relevant after any modifications. The presence of an audit does not imply that the contract is free of vulnerabilities or fully secure.

While we have conducted a thorough review, security is an ongoing process. We strongly recommend multiple independent audits, continuous monitoring, and a public bug bounty program to enhance resilience against emerging threats.

Stay proactive. Stay secure.

About QuillAudits

QuillAudits is a leading name in Web3 security, offering top-notch solutions to safeguard projects across DeFi, GameFi, NFT gaming, and all blockchain layers. With seven years of expertise, we've secured over 1500 projects globally, averting over \$3 billion in losses. Our specialists rigorously audit smart contracts and ensure DApp safety on major platforms like Ethereum, BSC, Arbitrum, Algorand, Tron, Polygon, Polkadot, Fantom, NEAR, Solana, and others, guaranteeing your project's security with cutting-edge practices.
