Executive Summary

Project Name	Space
Project URL	https://into.space/
Protocol Overview	Space is a decentralized prediction market platform built on Solana where you can trade on real-world outcomes across crypto, politics, sports, technology, culture, and more - and earn rewards for being right.
Space Coin Overview	SPACE is SPL token and it is a utility token designed to enhance the efficiency and usability of prediction markets without restricting demand from the user base. Requiring users to buy, hold or stake tokens in order to use a product gates access to it; Space enables everyone to use the platform without forcing them to interact with the token as this would limit demand and user base.
Method	Manual Review.
Timeline	18th March 2026
Audit Scope	The scope of this audit was to analyse the Space SPL Token Address for quality, security, and correctness. https://solscan.io/token/2MU93nLHhDsHzgEYBKbVbwLDd2pi71ubGp8SkEv9dZwQ#metadata

Manual Review Analysis

A review of the token's control parameters was conducted to assess risks related to metadata modification, token supply, and administrative privileges.

Token Details:

Name: Space (SPC)
Symbol: SPACE
Decimals: 6
Current Supply: 1,000,000,000

Contract Address:

[https://solscan.io/token/
7ZepRdt5BsrSYbFsgWtKNXihtoocBCYAgZiuZNXGxaGA#metadata](https://solscan.io/token/7ZepRdt5BsrSYbFsgWtKNXihtoocBCYAgZiuZNXGxaGA#metadata)

Mint Authority:

The mint authority has been revoked (null). This guarantees that no additional tokens can be minted beyond the current supply. No inflation risk is present.

Decimal Specification:

Our technical team has verified that the token's decimals are set to 6, as defined in the token configuration. This level of precision ensures that the token can be accurately represented, traded, and utilized across supported platforms without inconsistencies. The decimal configuration is correctly implemented and aligns with expected token behavior.

Freeze authority active :

Our team has verified that the freeze authority for the token has been revoked (null). This ensures that no entity retains the ability to freeze token accounts or restrict transfers.

Metadata mutable :

The token metadata is marked as immutable (isMutable = false). Although an update authority address is present, the immutability setting ensures that the metadata (such as name, symbol, and URI) can no longer be altered. No risk of metadata manipulation was identified.

Solscan Proof:

To further validate the information provided, we have attached a Solscan proof that confirms the mint,freeze,update authority disablement and decimal specification. This proof serves as an additional layer of assurance for you and your stakeholders.

Closing Summary

The token is working as intended with the following things:

- ✓ Mint Authority: null
- ✓ Freeze Authority: REVOKED
- ✓ Supply: 1,000,000,000
- ✓ Decimals: 6
- ✓ Mint Authority: REVOKED (No inflation)

Disclaimer

At QuillAudits, we have spent years helping projects strengthen their smart contract security. However, security is not a one-time event—threats evolve, and so do attack vectors. Our audit provides a security assessment based on the best industry practices at the time of review, identifying known vulnerabilities in the received smart contract source code.

This report does not serve as a security guarantee, investment advice, or an endorsement of any platform. It reflects our findings based on the provided code at the time of analysis and may no longer be relevant after any modifications. The presence of an audit does not imply that the contract is free of vulnerabilities or fully secure.

While we have conducted a thorough review, security is an ongoing process. We strongly recommend multiple independent audits, continuous monitoring, and a public bug bounty program to enhance resilience against emerging threats.

Stay proactive. Stay secure.

About QuillAudits

QuillAudits is a leading name in Web3 security, offering top-notch solutions to safeguard projects across DeFi, GameFi, NFT gaming, and all blockchain layers. With eight years of expertise, we've secured over 1500 projects globally, averting over \$3 billion in losses. Our specialists rigorously audit smart contracts and ensure DApp safety on major platforms like Ethereum, BSC, Arbitrum, Algorand, Tron, Polygon, Polkadot, Fantom, NEAR, Solana, and others, guaranteeing your project's security with cutting-edge practices.

8+ Years of Expertise	1M+ Lines of Code Audited
50+ Chains Supported	1500+ Projects Secured
